

## Linking Standards & Regulations to a Policy

If your site has the Standards & Regulations Add On, you can link standards or regulations directly to your policy.

In the Draft view of the policy, navigate to the properties tab. Scroll down to the Standards & Regulations field. Click to open the navigation pane. Click the Plus sign to expand a field and navigate the tree to locate the desired Standard or Regulation.

Click one or more items to link them to the policy. Clicking the X beside an item will remove it.

When the policy becomes active, the selected items will be linked and can be viewed by clicking the standard name in the header.
